# Office Action Summary

Application No.

10/687,632

Applicant(s)

SIMON ET AL.

Examiner

Melissa S. Mercier

Art Unit

1615

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 12 February 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-55 is/are pending in the application.
- 4a) Of the above claim(s) 7,9,16-18 and 49-54 is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-6,8,10-15,19-48 and 55 is/are rejected.
- 7) ☒ Claim(s) 32, 34 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

## Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some \* c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

## Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_

## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of Group I, Claims 1-48 and 55 in the reply filed on February 12, 2007 is acknowledged. The traversal is on the ground(s) that the division of the species is unsupported and improper and that a search burden does not exist for the office. This is not found persuasive because the search for the different species of dyes would require different search terms and structures. Additionally, the different structures would have different classifications in the art.

However, after further consideration, the examiner has withdrawn the election of species of a specific multilayer interface structure.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-55 are pending in the application. Claims 7, 9, 16-18 and 49-54, are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Group and Species, there being no allowable generic or linking claim.

### ***Priority***

Applicants claim of priority to US Provisional Applications 60/434,406 and 60/434,408 both filed on December 19, 2002, and French Applications 0213037 and 0213035 both filed on October 18, 2002 is acknowledged.

***Information Disclosure Statement***

Receipt of the Information Disclosure Statements filed on October 20, 2003, July 20, 2004, October 4, 2005, October 12, 2005, and March 22, 2006 is acknowledged.

***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:  
Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c).

***Claim Objections***

Claim 32 is objected to because of the following informalities: there is no space between the words "weight" and "of" in line 2 of the claim. Appropriate correction is required.

Claim 34 is objected to because of the following informalities: there is no space between the words "product" and "according" in line 1 of the claim. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-6, 8, 10-15, 19-48, and 55 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear to the examiner if applicant is claiming two separately packaged compositions on one final composition with is an admixture of two compositions, such as an emulsion wherein one dye would be water-soluble and the other would be liposoluble. Clarification is requested.

The location of R<sub>7</sub> is unclear according to formula (I). The examiner has interpreted the drawing to indicate R<sub>7</sub> can be at any open position on the core structure.

Regarding Claims 14-15, it is unclear to the examiner what a multilayer interference structure is. The specification has not provided a definition as to the meaning, structure, or properties thereof.

Regarding Claims 30 and 32, it is unclear what applicant is claiming by "apolar" oil. The examiner is interpreting this to be non-polar oil. A thorough review of the specification did not result in the finding of a definition of the term.

Regarding claim 34, the phrase "especially" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1615

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-6, 8, 10-15, 19-48, and 55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krongauz et al. (US Patent 6,627,121) in view of Lagrange (US Patent 6,123,952) and further in view of Polonka et al. (US Patent 6,369,147).

Krongauz discloses a photo chromic naphthopyran of the formula:

Art Unit: 1615

wherein R1 through R15, which may be the same or different, are independently selected from the group consisting of hydrogen, C1 -C4 alkyl, C1 -C4 alkoxy, halogen, C1-C4 alkylcarbonyloxy, benzoyloxy, C3-C6 cycloalkyl, phenyl, and NR16 R17, wherein R16 and R17 are each C1-C4 alkyl or together with the N atom form a 5-12 membered monocyclic or polycyclic ring having, optionally, one or more further heteroatoms; R is hydrogen, C1-C4 alkyl or C1-C4 alkoxy, and (C<sub>n</sub>H<sub>2n+1</sub>)--C--(C<sub>m</sub>H<sub>2m+1</sub>) is a tert-alkylene group, wherein n and m are integers from 1 to 5.

Krongauz discloses the compounds impart a yellow to blue colors.

Krongauz does not disclose using the compound in a cosmetic composition.

Lagrange discloses a cosmetic composition comprising a photo chromic compound. LaGrange discloses the photo chromic compounds are compounds which have the property of changing color when they are irradiated with a light source and then regaining their initial color when the irradiation stops (column 1, lines 43-46) The

Art Unit: 1615

composition can be in any cosmetically acceptable pharmaceutical form, such as in the form of a lotion, suspension, dispersion or solution in aqueous-alcoholic or solvent medium, which may be multi-phasic; in the form of a gel, a mousse, a spray, an oil-in-water, water-in-oil or multiple emulsion; in the form of a free, compact or cast powder; in the form of an anhydrous solid or paste (column 3, lines 46-54).

The photo chromic coloring agent is present in the amount of 0.05-30% by weight (column 6, lines 27-28). The composition also contains a cosmetically acceptable medium (column 6, lines 34-35). A fatty phase may be present comprising oils of animals, plants, mineral or synthetic origin, waxes of animal, plant, mineral, or synthetic origin, pasty fatty substances, gums, or mixtures thereof (column 6, lines 46-52).

Volatile oils may also be present, such as cyclic volatile silicones, cyclocopolymers, and linear volatile silicones; non volatile oils may be used, such as poly(C1-C20) alkylsiloxanes, silicones modified with aliphatic or aromatic groups, phenylsilicones, oils of animal plant, or mineral origin, fluoro oils and perfluoro oils (column 6, line 54-column 7, lines 64).

The aqueous phase can comprise from 0% to 14% by weight, relative to the total weight of the aqueous phase, of a C2-C6 lower monoalcohol and/or of a polyol such as glycerol, butylene glycol, isoprene glycol, propylene glycol or polyethylene glycol (column 8, lines 54-58).

When the composition is in the form of an emulsion, it can also comprise a surfactant, in an amount of from 0.01 to 30% by weight relative to the total weight of the composition (column 8, lines 59-63). The composition can also comprise one or more

Art Unit: 1615

thickeners in concentrations ranging from 0 to 6% by weight, relative to the total weight of the emulsion (column 9, lines 45-48).

The composition can also comprise a film-forming polymer. The polymers can be dissolved or dispersed in the cosmetically acceptable medium. In particular, the polymer can be present in the form of a solution in an organic solvent or in the form of an aqueous dispersion of film-forming polymer particles (column 10, lines 4-12).

The composition can also comprise a particulate phase, which can comprise pigments and/or pearlescent agents and/or fillers usually used in cosmetic compositions (column 10, lines 65-68). The fillers, which can be present, are in a proportion of from 0 to 30% by weight (column 11, lines 34-35). Pigments include white or colored, inorganic or organic particles intended to color or opacify the composition (column 11, lines 1-2), iridescent particles which reflect light (column 11, lines 8-9), and lakes and dyes (column 11, lines 16-25).

Neither Krongauz nor Lagrange teaches a separate composition comprising a goniochromatic agent to be used along with the naphthopyran containing composition.

Polonka discloses a cosmetic composition comprising a metallic effect pigment comprising an instant effect pigments have a high gloss, attractive goniochromatic shifts generally with a high dark flop effect, as well as surprisingly vivid, saturated colors and a good hiding power (column 4, lines 7-10). For producing a mixed interference/absorption effect pigment, the metal oxide of dielectric layer is a colored oxide or colored mixed oxide of elements of groups 5 to 12 (column 4, lines 43-46). For

Art Unit: 1615

producing a pure interference effect pigment, the metal oxide of dielectric layer (c) is preferably a substantially colorless oxide of an element of groups 3 or 4 (column 4, lines 60-63).

The instant claims differ from the references only in the specific percentage selected for the compositions. However, It would have been deemed *prima Facie* obvious to one having ordinary skill in the art at the time of the invention to optimize the percentage of each component, to prepare a composition containing a photo chromic dye for application as a cosmetic composition because the determination of a specific percentage having the optimum therapeutic effect is well within the level of one having ordinary skill in the art, and the artisan would be motivated to determine optimum amounts to get the maximum effect of the active compounds. Therefore, the invention as Whole has been *prima face* obvious to one of ordinary skill in the art at the time the invention was made.

It would have been obvious to a person of ordinary skill in the art to use the composition taught by Polonka in conjunction with the one taught by Krongauz and Lagrange in order to obtain a cosmetic product in which the effect pigment particles incorporated therein will, within the coating, align themselves parallel to the surface so that the colored paint surface, when illuminated by a fixed white light source may display different colors or will appear to have an iridescent color depending on the viewing angle (column 1, lines 7-15). It is within the skill and the knowledge of the person of ordinary skill in the art to coordinate composition in order to obtain the desired make up effect.

**Conclusion**

No claims are allowable. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melissa S. Mercier whose telephone number is (571) 272-9039. The examiner can normally be reached on 7:30am-4pm Mon through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward can be reached on (571) 272-8373. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
